

- Done
  - Kellie: Committed most of the signUp query (need to verify); tried JS for addItem on separate branch, under ngk4-admin-addItem-fetchquery
  - Christian: Worked on the users tab in the admin homepage. Created two queries and fetched from those queries to display the current users in a given lab.
  - Miranda: will create a PR to merge backend into main. Completed issue regarding hamburger menu not closing (Kellie merged).
  - Heman: Working on that 'deceptive site ahead' message. Identified a handshake error on the Chrome version & is testing on a dummy VM.
  - Catherine: delete item works, but JS problem, Billy thinks can fix; writing edit item query
  - Billy: Added pagination and searching
- To Do
  - Heman: Ask Callahan if the dangerous error cannot be resolved.
  - Christian: Work on the addUser and removeUser forms on the users tab in the admin homepage, addUser JS
  - Catherine: admin edit item query and JS
  - Billy: delete item JS fix (bradsc-delete-item branch); borrowing history?
  - Miranda: removeUser query
  - Kellie: working on presentation - note: 20 mins for slides+demo, 10 mins questions
