

- Upcoming due date: 10/25, mock-up front-end
- Billy created a general database design

- during construction, he needed to follow database normalization
- Add email field to users ✓
- Potentially just use location names instead of ids
- Add dateReturned field to reservations ✓
  - Won't delete when returned, just mark as returned
- Miranda will make wireframes for front-end, share on Monday
  - Will vote on color palettes
  - Then discuss, front-end team actually develops final version
- For 10/25, will be bringing fake data from .json probably (not real data)
- Will flesh out feature descriptions in a doc
- Scrum logs will go in branch, periodic merges
  - Heman will create, also write log about monday meeting (worked on lab, VM, agreed to merge at 11:30)
- We split up the team into a front end and back end team
  - Front end:
    - Miranda
    - Catherine
    - Christian
  - Back end:
    - Kellie
    - Billy
    - Heman
- When have more detailed flow, a bit of a mock-up, will share with potential stakeholders to get feedback
