

Things completed last week:

- Heman making small changes on branch for validation, moving styling to external CSS, then merging Christian's PR by EOD
- Miranda copied the original base markup of the admin-homepage and adapted it for the user homepage and started working on CSS for the the two pages
- Catherine and Christian had exams, will work over weekend

Things discussed today and for next time:

- Changed the "Iterations" on Github Projects to "Sprint" and specified the 3 sprints, identifying each task to a sprint.
- Backend if meeting tomorrow to sort their tasks out.
- Front-end will continue working on tasks assigned.
 - Christian and Miranda will work on writing a "fuller" blurb for the application on the homepage, will be done by Saturday Night and Christian will add it to the landing page on Sunday.
 - Catherine working on admin homepage styling, sign-up/log-in page
