

- Done
  - Miranda almost done with change password form, branching from backend branch; pathing for dropdown menu has an issue, can fix
  - Christian changed add/delete item forms, wrote edit form; needs to be merged
  - Billy: pagination, search functions on My Labs page
  - Catherine: created a merging branch off of backend, made changes to the backend and needs to update it
  - Kellie: working on Add Item query
- To Do
  - Catherine: continuing to merge & writing delete item query; will merge Christian's edit form into main, then deal with her branch and ping Miranda to merge it
  - Christian: adding to Admin homepage so can see list of users, also little form at the bottom to add another user to the lab based on their username
  - Billy: borrowing history - all queries!
  - Miranda: merging Catherine's branch when ready; cancel reservation query
  - Kellie: Add item query fixes; then add user query

*Written On: 11/18; Heman absent due to illness; according to product backlog, he is working on Sign Up query*
