

Presentation CANCELLED, guaranteed A - thank you Dr. Callahan :)

- Done
  - Miranda: merged Christian styling fix PR; made PR w/ styling consistency improvement, image updating, & fixed merge conflicts
  - Christian: added styling e.g. for buttons, autofill edit form, etc.
  - Billy: backend permission checking & input validation; removed unused "reason" field for checkouts; removed excess logging & printing; JS for additem query; borrowing history changes but time zone problems; removed image stuff
  - Kellie: has open PRs for additem query (w/ merge conflicts), but Billy merged his changes first
  - Heman: security changes (X-Content-Type, etc) but there's a lot of conflicts so is focusing on removing inline JS; some changes on VM with http headers.
  - Catherine: task was to work on slides but presentation got cancelled; waiting to minify
- To Do
  - Users can't mark items as returned or cancelled, only admins can - are leaving as is
  - Ask in class - do we need to review our peers?
  - Time zone issues might be due to PHP datatypes; low priority problem, are leaving as is
  - Merge backend branch with main - done by Heman!
  - Heman: working on more security improvements on own branch, will merge into main by tmw midnight; adding README; merging Billy's PR, pulling to VM, will merge Miranda's PR
  - Catherine: minification after styling changes
  - Billy: will fix edit form, which was broken
  - Miranda: form button & borrowing history color changes; homepage links ("sign up for free," "explore possibilities")
  - Christian: reviewing Miranda's button, etc. PR
  - Closing issues & PRs, keeping projects up to date
